- Junior (MW14 – MW18)
- Open (MW20 – MW40)
- Master (MW50 +)

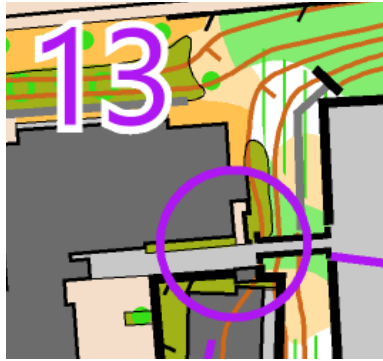

Event Centre

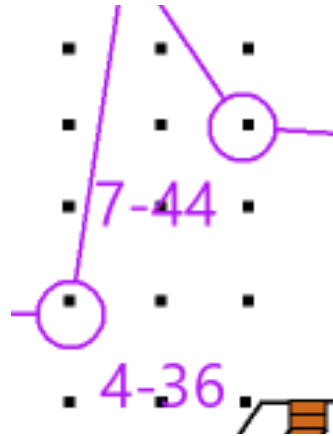

Multi-level section – please read carefully

In this event we will be introducing a multi-level area of the map.

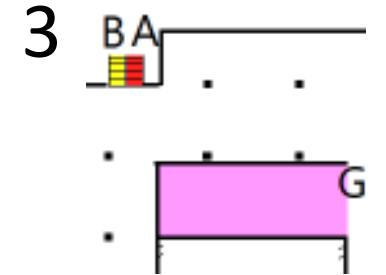

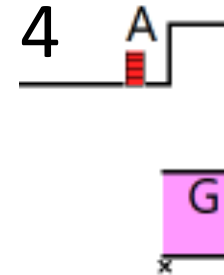

On the main side of the map you will see a control leading in to the Car Park.

On the reverse side of the map there will be 4 levels with legs between controls on different levels of the Car Park.

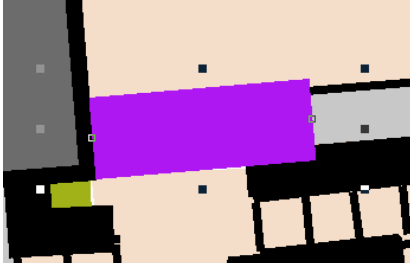

Controls will be listed with their number first and the box number 2nd – no control descriptions

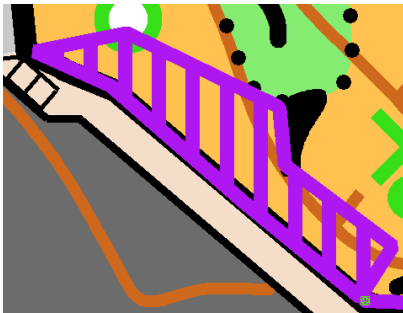

Stairwells and ramps will be connected by the same letter and colour. Stairwell A from level 4 connects to stairwell A on level 3. Ramp G connects with ramp G

There are 9 different connecting stairwells and ramps in the car park complex

Additional sections of the course

Artificial barriers. We will be adding an artificial barrier on the map. Signified by a blocked passage – which will introduce additional complex route choice legs

Out of bounds area. There is a specific section of the campus with a wall that is impassable on the map but looks potentially passable at one end. As a result we have excluded any doubt by mapping an out of bounds area and having this clearly taped off on the day

Graveyard start and transition. We will be introducing a graveyard start for all three legs where the runners start and transition next to a pole with their maps wrapped round their start post.
